EDUCATION

California State University, Long Beach — **Long Beach, CA**
Bachelor of Science, Aerospace Engineering — **May 2025**

SKILLS

Software skills: Solidworks, Matlab, Python, C/C++/CSS, Javascript, React, Ubuntu, Labview, Simulink, OpenFOAM/Paraview, Siemens NX, Altium, Ansys, Stoke Fusion
Hardware skills: Jetson Nano, Arduino, STM32, Raspberry PI
Technical skills: Power tools, Manometer, Wind tunnel, Soldering, CNC machines

WORK EXPERIENCE

Trans Astronautica Corporation — **Los Angeles, CA**
Mechanical Engineering Intern — **Oct 2024 - Current**
- Worked in a small team to design and build a full telescope enclosure.
- Designed various part and assemblies for manufacturing using GD&T in Solidworks
- Manufactured with lathe, vertical/horizontal band saws, drill press, manual mill, CNC mill, and 3d printer.
- Wired and tested various motors and sensors from Pololu and Digikey.

RELI Installation — **Bloomington, CA**
Technician — **Jun 2022 – Aug 2024**
- Installed over 100 Axon Fleet 3 camera systems into law enforcement vehicles
- Modified electrical systems of vehicles to power camera's computing and telecommunication systems
- Repaired and operated a PlasmaCam/HyperTherm CNC plasma cutter
- Proficiently utilized power hand tools to install cameras, brackets, and other components.
- Skillfully maintained and tracked physical inventory utilizing Microsoft Excel.

ENGINEERING PROJECT EXPERIENCE

Aerospace Engineering Capstone — **California State University, Long beach**
Hardware/Software Lead — **Aug 2024 – Current**
- Designed a 150 wattage electrical system with DC and AC power simultaneously
- Programmed a GUI to interface with a Raspberry Pi 5 through python and linux
- Wired and soldered system to have safe and proper groundings

LAEP Research — **California State University, Long beach**
Research Assistant — **Sep 2023 – Current**
- Operated unscrewing mechanism through software such as Linux/Ubuntu and python
- Programmed hardware such as the Jetson Nano and Arduino to operate a camera, motors, motor drivers, and relays.
- Designed a parallel gripper system for unscrewing automation

Long Beach Lunabotics — **California State University, Long beach**
Mechanical Team member — **Aug 2023 – May 2024**
- Designed a disposing mechanism of a 2 part conjoin rover within Solidworks
- Manufactured parts with Shapeoko CNC router through Carbide 3D software
- Worked alongside electrical engineers to help solder, wire and fasten various electrical components within the rover

Experimental Sound Rocket Association — **California State University, Long beach**
Team Member — **Aug 2024 - Current**
- Involved in creating an open source liquid rocket model in Matlab
- Constructed a switch box for manually controlling valves for launch.
- Manufactured fuel and oxidizer tanks with a factor of 2
- Contributed to the hydrostatic testing of fuel and oxidizer tanks.
