

Denver Davis

(909)552-4299 | Denverdavis1209@gmail.com

EDUCATION

California State University, Long Beach
Bachelor of Science, Aerospace Engineering

Long Beach, CA
May 2025

SKILLS

Software skills: Solidworks, Matlab, Python, C/C++/CSS, Javascript, React, Ubuntu, Labview, Simulink, OpenFOAM/Paraview, Siemens NX, Altium, Ansys

Hardware skills: Jetson Nano, Arduino, STM32, Raspberry PI

Technical skills: Power tools, Manometer, Wind tunnel, Soldering, Shapeoko, Plasma Cutter

WORK EXPERIENCE

Trans Astronautica
Mechanical Engineering Intern

Los Angeles, CA
Oct 2024 - Current

- Assembled an open and closing enclosure actuating with pneumatic motors.
- Created CAD drawings in Solidworks following GN&T of various parts of the enclosure
- Accessed remote systems to promote network connectivity
- Wired and controlled dc gearbox pololu motors and Firgelli Actuators
- Worked in a small team to design and build a full telescope enclosure.

RELI Installation
Technician

Bloomington, CA
Jun 2022 – Aug 2023

- Installed over a 100 Axon Fleet 3 camera systems into law enforcement vehicles
- Operated a PlasmaCam/HyperTherm plasma cutter for commercial retail
- Proficiently utilized power hand tools to install cameras, brackets, and other components.
- Added fuses and rewired the electrical systems of automotive vehicles
- Skillfully maintained and tracked physical inventory utilizing Microsoft Excel.

ENGINEERING PROJECT EXPERIENCE

LAEP Research
Research Assistant

California State University, Long beach
Sep 2023 – Current

- Operated software such as Linux/Ubuntu and python.
- Programmed on a Jetson Nano and Arduino to operate a camera, motors, motor drivers, and relays.
- Designing a parallel gripper system with a dc motor

Long Beach Lunabotics
Team member

California State University, Long beach
Aug 2023 – May 2024

- Designed a disposing mechanism of a 2 part conjoin rover within Solidworks
- Manufactured and assembled the disposing mechanism with a Shapeoko
- Worked alongside electrical engineers to help solder, wire and fasten various electrical components within the rover

Computational Fluid Dynamics
Research Assistant

California State University, Long beach
Nov 2023 – Mar 2024

- Computational fluid dynamics analysis of hydrogen jet crossing flames using Open Foam/Paraview to optimize hydrogen and oxygen combustion
- Reported weekly with Professor to discuss results and procedures

Big Idea Challenge 2024
Hardware/Software Lead

California State University, Long beach
Oct 2023 – Feb 2024

- Lead engineer of 5 engineers for the Hardware/Software development of an autonomous disposal mechanism
- Supervised the development of a space rated solar powered battery system for autonomous performance
- Initiated the concept of a fluid free thermal system to operate in a closed system within a vacuum
- Simulated stress reports of different structures in Solidworks and Ansys
